

A Message from a Psychiatrist in Gaza
October 12, 2023

Dear colleagues

Thank you very much for your support. To recap, all indicators point to the fact that the Israeli plan is to make life so intolerable in Gaza and push the population either to throw themselves to death or to try to flee to Egypt. It is what the Israeli PM and army chief declared publicly - not my analysis- my prediction is that the population will equally choose one or the other, no other options are available.

As for the international community, it is clear that the governments are either intimidated by Zionist pressure, or blatantly supportive of this final solution.

As for me and my family we have decided to stay in Gaza alive or dead, many others have reached this decision.

There will be a day where we confront our oppressor and demand justice. Given humanity's condition during these interesting times, this day will not be in this world.

You do me a last favor by spreading my words of agony, the least we deserve is that humanity hears our cries of pain.
